

Objectives

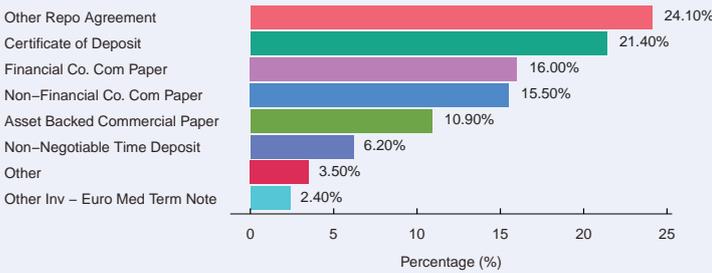

The overall objective of the currency funds is to provide a wholesale rate for a currency chosen by the investor with the opportunity to switch at any time between the various currency funds, without any switching charge and at wholesale rates of foreign exchange. The underlying investments are primarily in cash deposits denominated in the currency of the relevant currency fund.

Performance

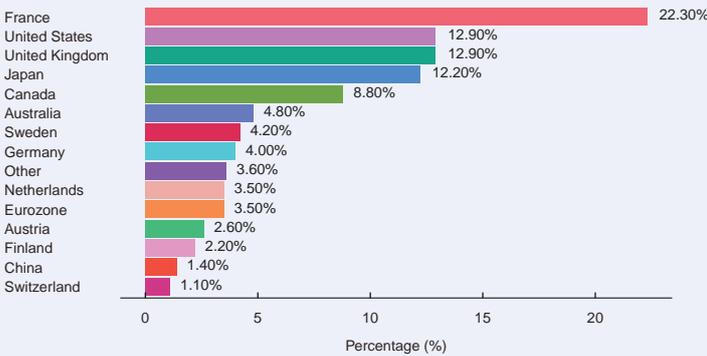

Statistics	1 Year	3 Years	5 Years	10 Years
Fund Annualised Return: Class A	2.79%	0.42%	-0.20%	-0.55%
Fund Annualised Return: Class B1	-	-	-	-
Benchmark Annualised Return	3.56%	1.06%	0.37%	-0.02%
Highest Return over 12 rolling months	2.60%			
Lowest Return over 12 rolling months	-1.31%			

No performance is currently included as performance data may not be shown for portfolios/classes that have less than a 6 month track record.

Portfolio costs (TER, TC and TIC)

Fund Class	TER (12 m)	TER (36 m)	TC (36 m)	TIC (36 m)
Class A	0.84%	0.82%	0.00%	0.82%
Class B1	0.59%	0.59%	0.00%	0.59%

Total Expense Ratio (TER): This shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated over a rolling three years (where applicable) and annualised to the most recently completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs.

Transaction Costs (TC): The percentage of the value of the fund as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Where a transaction cost is not readily available a reasonable best estimate has been used. Estimated transaction costs may include Bond, Money Market and FX Costs (where applicable).

Total Investment Charges (TIC): The percentage of the value of the Fund incurred as costs, relating to the investment of the Fund. As fund returns are reported after deducting all fees and expense, these costs (the TER & TC) should not be deducted from the fund returns. It is the sum of the TC & TER.

Minimum Disclosure Document as of 29 February 2024

Risk profile: ●●●●● **Conservative**

The fund is a class fund of STANLIB Offshore Unit Trusts which invests exclusively in the corresponding JPMorgan Liquidity Funds - EUR Liquidity LVNAV Fund.

The Euro Cash fund aims to maintain capital value and liquidity while producing a return for investors in line with money market rates. The Stanlib Euro fund, managed by J.P. Morgan Asset Management, uses high quality short-term Debt Securities, deposits with credit institutions and Reverse Repurchase Agreements to enhance returns. Investments will have a credit quality consistent with maintaining a Fitch Fund rating of AAA and a rating of AAA by Standard & Poor's for the fund. The fund's weighted average maturity is 31 days.

The European Central bank (ECB) made no change to its policy rates at the last meeting of 2023. The key deposit rate remained at 4.00%, the main refinancing rate at 4.50% and the marginal lending rate at 4.75%. This was the second consecutive meeting with no hike after eleven previous consecutive hikes. The ECB announced its intention to scale back reinvestments of maturing assets from its Pandemic Emergency Purchase Programme (PEPP) during H2 2024, with the aim of reducing its PEPP portfolio by €7.5bn per month (about half of what is maturing each month) before ending PEPP reinvestments completely by the end of 2024.

As the press conference made clear, the ECB still sees the three-pronged data-dependent approach it had previously outlined for gauging the appropriate level of policy rates as valid. Inflation forecasts had improved; underlying measures of inflation had generally declined; and the transmission of the policy stance was forceful both in terms of rates to households and firms and in terms of lending volumes. But it came across just as strongly that there were still two key reasons why it was too early for the ECB to 'drop its guard' and start considering cutting rates. President Lagarde was explicit that, in contrast to the Fed, rate cuts were not discussed and there was no debate on the subject.

Growth and inflation forecasts for 2023 and 2024 were downgraded but not for 2025. In terms of GDP, the ECB is now looking for 0.6% growth in 2023 and 0.8% in 2024.

The ECB's stance remains that staying on hold 'for a sufficiently long duration' remains the best course of action, and that it is wisest to point to data dependency rather than make a timing commitment on when rate cuts could begin. The market's view remains that rate cuts might begin as soon as in March, and certainly by April. For this to materialise, it will take further clear downside surprises in inflation and a sharper downturn in activity. The ECB will probably take more convincing to move as quickly and as aggressively as markets now price in.

Statutory disclosure and general terms & conditions

Collective investment schemes in securities are generally medium to long-term investments. The value of participatory interests may go down as well as up and investors may get back less cash than originally invested. Past performance is not necessarily a guide to future performance. An investment in the participations of a collective investment scheme in securities is not the same as a deposit with a banking institution. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Participatory interest prices are calculated on a net asset value basis, which is the total value of all assets less liabilities in the Class Funds including any provisions made for any purchase, fiscal or other charges that would have been incurred had all the assets of the relevant class fund been bought or sold at that time, divided by the number of participatory interests in issue. Please refer to the prospectus for more details on the charges and expenses that may be recovered from the Class Funds. Participatory interests are priced daily using the forward pricing method. The Class Funds may borrow up to 10% of the market value of the Class Funds to bridge insufficient liquidity as a result of the redemption of participatory interests. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending.

A schedule of fees and charges and maximum commissions is available on request from STANLIB Fund Managers Jersey Limited, ('the Manager'). The Class Funds of the STANLIB Offshore Unit Trusts scheme, are Feeder Funds which only invest in the participatory interests of a single Class Fund of a collective investment scheme. In addition to the annual management charge, other fees are incurred by the trust (trustee, custodian and general expenses). There is no sales tax applicable in Jersey. Commission and incentives may be paid and if so, are included in the overall costs. The Class Funds of STANLIB Offshore Unit Trusts scheme are accumulation Class Funds and do not distribute income. Please refer to the prospectus of this scheme for more details, a copy of which is available on request from STANLIB Collective Investments (RF) Pty. Limited, ('STANLIB'), the address of which is 17 Melrose Boulevard, Melrose Arch, 2196, South Africa. The registered office of the Manager is Standard Bank House, 47-49 La Motte Street, St Helier, Jersey, Channel Islands. The Trustee is Apex Financial Services (Corporate) Limited, 12 Castle Street, St. Helier, Jersey, Channel Islands.

A representative agreement exists between STANLIB Collective Investment (RF) Pty. Limited and STANLIB Fund Managers Jersey Limited.

Class Funds are valued on a daily basis using 23:59 (UK Time) prices. Transaction requests received before 14h30 (UK Time) will receive the following day unit price. This is an accumulation portfolio and does not distribute income.

The Manager and trustee are regulated by the Jersey Financial Services Commission to conduct Fund services business.

The Trust is regulated as a Collective Investment Fund by the Jersey Financial Services Commission.

Figures quoted are from Morningstar for a lump sum investment using NAV-NAV prices.

Liberty is a member of the Association of Savings and Investment of South Africa.

The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The Manager has a right to close the portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate.

Additional information

Additional information about this product, including brochures and application forms can be obtained from the Manager, free of charge and from the website www.stanlib.com.

The prices of unit trust funds are calculated and published on each working day. These prices are available on the Manager's website (www.stanlib.com) and in the South African printed news media.

Target market

STANLIB promotes using the services of an accredited Financial Adviser when making investment decisions.

Please contact either your accredited Financial Adviser or our Contact Centre on 011 448 6000 if you have any questions about this product.

Risk rating explanation

The risk rating seen above is designed to give an indication of the level of risk, measured by volatility, associated with this specific portfolio.

In order to arrive at the specific risk rating of the portfolio in question, STANLIB measures the volatility of the fund, in the form of standard deviation, over a three year rolling period, and compares the result to internal risk parameters. Please note that these risk ratings are designed as guide only.

Fund management

The investment management of the underlying fund is managed by J.P. Morgan Asset Management

Risk

Where foreign securities are included in the portfolio there may be additional risks, such as potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, tax risks, settlement risks and potential limitations on the availability of market information.
